Alien Shooter 2 Conscription Unlock Code | Tested 13 DOWNLOAD:. shooter 2 conscription. alien shooter 2 conscription enter unlock code . for pc,.Q: Can I make a pointer change a char array when another char array changes? char s[] = "hello"; char* r = s; r = "ho"; Is r equal to s?

A: Technically, yes you can change the content of an array through pointers (as you already noticed). A pointer does not (by definition) "own" the array it points to. It just gives you access to the value at that address. In your case the array s is assigned to a pointer r which is a pointer pointing to the first element of the s-array. When you change r to point to the second element of the s-array you are actually changing the s-array and this change will be reflected everywhere that r is used as long as r still points to an array element. You can, but it is not recommended. What will you get by doing this? printf("%s",r); // would print ho What are you trying to do with this? An array is an dynamic allocated memory. It cannot be changed (dynamically allocated) at run time. Let us say you have a new word, you can allocate memory and store it in s 82157476af
