Download

One of the key feature of vray is that it does not depend on any specific renderer, as most renderers such as asp, raytracer, POVray and others directly connect to the rendering engine. V-Ray version history In the following table, the application version and release date are listed. The renderer version and release dates are given. The use of the final version number for the renderer is decided by the company that develops the renderer. For example, the release notes of version 3.4.9 of ParaView mentioned that the application runs on platforms including Windows, Mac and Linux. The same is true for V-Ray 3.4.9. The final version of the renderer is version 3.4.0, and this is the one released by the company. See also Autodesk's 3ds Max 2013 and 3ds Max 2014 suites and version numbering (which has somewhat different versioning) Autodesk's 3ds Max 2014 and version numbering Autodesk's Maya 2013 and version numbering Autodesk's Cinema 4D version numbering Autodesk's Nuke 8.5 and version numbering Autodesk's Navisworks v2015 and version numbering Autodesk's Revit 2014 and version numbering
